## **RECENT JOB EXPERIENCE:**

**04/1997 - Present      President/CEO**

**GeoData Publishers, Inc.    College Station, TX**

GeoData Publishers was started to provide database management & publishing in the oil industry. GDP continues to provide other services such as satellite communications systems, networks, Internet sites, and software for its clients over the 9 years the company has been in business. GDP is profitable and self-sufficient. My role is to provide leadership and direction, new business development and sales, as well as manpower & expertise for select high-level projects.

**10/2000 – 2001          President/CEO**

**Connect Development Inc.    College Station, TX**

While working on sales materials for GeoData publishers, we developed a product that markets web sites using joint CD/Web technologies. Connect Development Inc. was created to further develop and market the Connect Product. This company now is predominately a holding company for equity rights in Manatee Technologies Inc.

**07/2001 – Present      Chief Technology Officer**

**Manatee Technologies    Omaha, NE**

Manatee Technologies was formed to further develop the now patented CD/Web based technology. My responsibility is to provide consulting on an as needed/as available basis, as well as serve on the board of directors and provide technology development direction for Connect related products.

**01/1996 -- 05/1996      Programmer**

**TDI Brooks International, Inc./B&B Laboratories, Inc.    College Station, TX**

I was one of the original-founding stockholders. Responsible for all aspects of laboratory data management, automation, instrument integration, and management of IT personnel, computer maintenance, training and support. Recently, they have recruited me to develop a ship management system that tracks all of their operations worldwide, in order to help them comply with the various audit demands regarding safety protocols and training of crewmembers onboard their research vessels. TDI-Brooks International is currently operating in the Gulf of Mexico, the Coast of West Africa, the Indian Ocean, and the Coast of Brazil.

**08/1994 -- 01/1996      Programmer**

**Texas Digital Systems, Inc.    College Station, TX**

I was responsible for product support and development, communications software for financial transaction monitoring, and other critical computing systems.

**06/1988 -- 08/1994      Programmer**

**Geochemical and Environmental Research Group/ Texas A&M University.    College Station, TX**

I was responsible for data management of large-scale projects and laboratory automation. I initiated the production of a custom software program that used a mouse to integrate the area under curves of Gas Chromatograms. This improvement increased the throughput of the lab 400%. Prior to this, Gas Chromatograms were analyzed with paper, pencils and rulers. The director of this laboratory is now the owner of TDI-Brooks International, and B&B Laboratories. They are Geodata's largest client.
