ACCOMPLISHMENTS:

Construction/Renovation

Responsible for all aspects of the renovation and maintenance of the TDI-Brooks International and Geochemical and Environmental Research Group conforming to standard construction practices and codes. Fabricate economical and efficient workspaces for mobile laboratory vans, administrative offices, and warehouse facilities. Supervise and coordinate efforts of student workers, professional craftsmen, and outside contractors to assure a quality product is produced in a timely and cost-efficient manner. Manage budgets, project costs, and secure project financing.

Management

Research and make recommendations concerning the methods, codes, and materials required for proposed repairs and renovations. Logistical planning of the mobilization and demobilization of multiple field sampling operations including the development of new tools and equipment, repair, maintenance, and utilization of equipment; ordering and coordinating domestic/international shipping of vital replacement parts and supplies; improvising and troubleshooting as situations arise to insure a smooth-flowing operation; and promoting a 'team spirit' work environment with hands-on assistance in any needed area.
